Projects

MovieCollection App: Developed using; Flutter, Dart, Supabase

- Users can search for movies through the TMDB API or manually add them to their collection or wishlist.
- They can update and delete movies, and the app offers features such as grouping, sorting, and different views.
- It also includes special pages for similar movies, genres, actors, authors, and directors.

Göktürk Translation App: Developed using; Flutter, Dart

- It translates from Latin Alphabet Turkish to Old Turkic.
- The app explains the Old Turkic Alphabet and Rules.
- It also includes a Turkic Dictionary and Proverbs, and displays Orkhon Inscriptions in both Old Turkic and Modern Turkish.
